New position available Microbiologist - Genetics

Olgram

Place of work: Archamps (Fr) / Geneva (CH)

Olgram is a leading biotechnology company at the forefront of cutting-edge research and innovation. We are committed to advancing the discovery of new medicine to cure immune related and infectious diseases thanks to groundbreaking discoveries and breakthrough solutions that have a positive impact on global health and the environment. As we continue to expand our research and development efforts, we are seeking a dedicated and skilled Microbiologist with a strong background in genetics to join our dynamic team.

We are looking for a passionate Microbiologist with expertise in genetics to contribute to our ongoing projects in molecular biology. The ideal candidate will play a key role in the design and execution of experiments, contribute to data analysis, and work collaboratively with a multidisciplinary team of scientists to drive forward our mission of creating new tools to fight the chronicity of infectious diseases.

Key Responsibilities:

- Genetics Research: Lead and support research projects focused on microbial genetics, including but not limited to gene expression, genetic modification, and genotyping.

- Experimental Design: Develop and execute experiments to investigate genetic elements, pathways, and mechanisms related to our biotechnology initiatives.

- Data Analysis: Analyze experimental data, interpret results, and contribute to the development of scientific reports and publications.

- Collaboration: Collaborate closely with cross-functional teams to integrate genetic insights into biotechnology applications.

- Laboratory Management: Maintain laboratory equipment, ensure compliance with safety protocols, and help with inventory management.

Qualifications:

- Ph.D. and/or post-doctorate in Microbiology and Genetics, or a related field with a focus on genetics.

- Proven experience in microbial genetics, genetic engineering, and related techniques.

- Strong knowledge of molecular biology techniques, gene expression analysis, and gene editing technologies.

- Proficiency in data analysis and relevant software tools.

- Excellent communication and teamwork skills.

- Strong problem-solving abilities and a commitment to scientific rigor.
Benefits:

- Competitive salary (depends on the experience of the candidate)
- Opportunity to work on groundbreaking research in a collaborative and dynamic environment.
- Access to state-of-the-art facilities and cutting-edge technologies.
- Ongoing professional development and growth opportunities.
- A commitment to work-life balance and a positive work culture.

How to Apply:

If you are a passionate and driven Microbiologist with a strong background in genetics, and you are excited to be part of a team at the forefront of biotechnology innovation, we encourage you to apply. Please submit your resume, a cover letter highlighting your relevant experience (body of the email is sufficient), and contact information for at 2 professional references to pierre.rocheteau@olgram.com directly.

Olgram is an equal opportunity employer and welcomes candidates from all backgrounds to apply. We look forward to welcoming a new team member who shares our commitment to advancing biotechnology for the benefit of society.
